Dear Interested Party:

Makoil, Inc. has submitted an Application for Permit to Drill (APD) a wildcat oil well, Cabin Spring 18-44, in Long Valley, White Pine County, Nevada. Drilling is expected to occur in the summer of 2008. The legal description is T 21 N, R 59 E, section 18. A map is attached.

Access is from the paved portion of County road No 3, the road from US 50 to the Ruby Marsh Wildlife Management Area. Disturbance for the well pad location would be approximately two acres. Access to the project area would consist of approximately 2,000 feet of existing road. Water would be obtained from an existing well located approximately two miles south of the oil well location. Gravel for surfacing the well location and access road would be obtained through a sales contract from an existing pit approximately eight miles south. Reclamation would consist of recontouring and reseeding the pad and the access road.

The area is known to contain important wildlife such as migratory birds, pygmy rabbits, ferruginous hawks, and sage grouse. It is within the Buck and Bald herd management area for wild horses and the Warm Springs grazing allotment.

An Environmental Assessment is being prepared. Comments on the proposal and requests for additional information should be sent to Bill Wilson at William.Wilson@nv.blm.gov, by mail at the above address, or by phone at (775) 289-1882. Comments must be received by June 27, 2008.

This, and subsequent information, may be available on the new Ely BLM website under "NEPA": http://www.blm.gov/nv/st/en/fo/ely_field_office.html

Thank you for your interest in the public lands.

Sincerely,

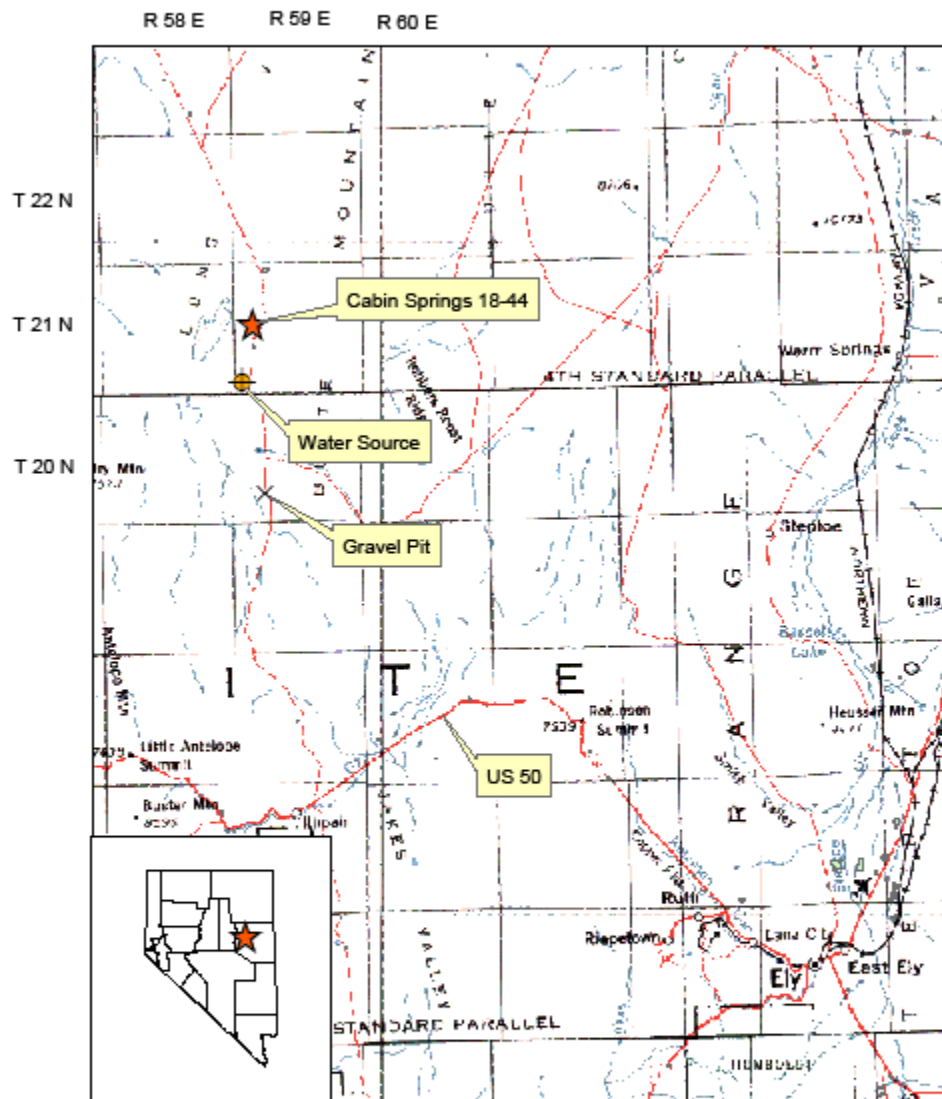

Jeffrey A. Weeks
Field Manager
